Testimonial For Bryston Lim Jing Xuan

To whom it may concern

Bryston Lim is an energetic young student who is always keen to observe and learn. Along with strong technical skills he also has the necessary soft skills which enables him to communicate confidently with anyone whom he deals with.

During his internship tenure with me he has displayed excellent character and attitude towards his area of work and duties. He was responsible to deliver as a key member of the Cyber Security team in the following major areas:

- 1) Monitor and track system usage, performance logs and log reconciliation
- 2) Perform IT security hardening
- 3) Perform vulnerability testing
- 4) Assist in Warranty of Fitness process
- 5) Gitsir Alerts Tracking
- 6) Assist in security operations

During the internship he got the opportunity to observe and understand about installation / configure / maintain networks, hardware peripherals, and operating systems / software applications. He was also guided in the Risk Impact Analysis activity for Patch Installation and Upgrade processes.

Bryston has a sound technical background and good analytical skills. I find him keenly interested and capable in fields such as Information Technology, Cyber Security and related areas of study and practices.

I would highly recommend Bryston Lim for someone looking for superior quality candidate with a record of consistent achievements.

I may be reached for any further queries or clarifications if need be.

Sincerely,

Vaishali Maratkar,
Lead Information Security Officer,
Cyber Security Governance Division for NCS @ IRAS
